FROM DESIGN TO PRODUCTION

SPITZER STUDENTS TOUR GLENWOOD MASONRY SUPPLY FACILITY

Hands-On Industry Experience

Students from the Bernard and Anne Spitzer School of Architecture participated in a Design-Build Concrete Masonry Investigation class and competition exploring structural systems, modular coordination, and architectural expression using CMU.

To extend their learning, students toured Glenwood Mason Supply Company's block manufacturing facility, gaining firsthand insight into CMU production, material performance, and real-world applications—bridging classroom design with industry practice.
